

SECURE CONTAINER OPTIONS

Use our containers for FREE as long as MDS is your shredding company of choice

Mobile Data Shredding provides over 20 styles of security bins for our Scheduled Service Customers. Each requirement may have its own solution. Examples are:

- Special designed Containers for secure storage of Computer Tape & Hard Drives
- High Capacity Wheeled Containers (up to several hundred pounds of capacity)
- Small Containers for under desk applications or portability
- Special order Container colors or laminate finishes
- Custom Container labels for separating files and/or types of media for destruction

Secure Container Options

Executive Console

This lockable container is manufactured of sturdy furniture grade materials with a laminate finish and fits nicely in an office environment. Paper files are inserted from the front of the container allowing for placement of a printer, fax machine, office files, or something similar on top of the unit. A heavily constructed nylon bag collects paper files inside the Executive Console. Capacity is 60-80 lbs.

Wheeled Container / Secure Collection Cart

This container is mobile and very durable. The lid is hinged on the top with a recessed lock. Paper files are inserted into the top. The handles and well balanced design make this container easy to move in and out of offices, outside, and even up and down stair cases. The Wheeled Container is mounted directly into our Mobile Shredding Vehicle's automated 'Tipper'. This system not only provides for faster and safer movement and shredding of paper, but adds an additional level of security with one less step of manual contact with your confidential files. Capacity is 200-250 lbs.

Secure On-Site Scheduled Service

Secure Containers are installed in our Scheduled Service Customers' offices. These lockable containers are for collection and storage of your confidential documents. A one-way slot is built in for inserting paper files. One key is left with a responsible person on your staff for retrieval purposes. When The Mobile Data Shredding Field Representative arrives for On-Site shredding services, the container is unlocked, paper files transported to the Mobile Shredding Vehicle parked at your facility, and securely shred under your supervision.
